Bio Image launches pair of Auto-Calibrating Scanners

Bio Image Systems, Inc. announces the *ACS-5000* and *ACS-6000* auto-calibrating scanners. They combine a state-of-the-art Microtek “Bio” life-science scanner with our industry proven software to make a system which quickly and accurately analyzes your samples.

The scanners feature a **user-replaceable** NIST certified calibration strip, so you not only have complete confidence in the quantitative accuracy of your scans, you don’t need to call a service engineer when your strip reaches its expiry date. And the strip is both sealed in plastic, and behind a dam on the water-tight wet gel tray.

Each scanner comes with a copy of *Intelligent Quantifier® 1-D* for analysis of 1-D wet gels, dry gels, and membranes. Or you can upgrade to full *Intelligent Quantifier*, *Advanced Quantifier™*, or *Intelligent Quantifier-11™*.

Please visit our website, www.bioimage.net, for a comparison of us and our competition: “the Other Bio”.

About Bio Image Systems, Inc.

Started in 1982, we believe we are the oldest life science imaging company continuously doing business under the same name, and continuously dedicated to one thing only: bringing you the best imaging systems and software available.
